PROJECTS

Disney + clone – MERN (MongoDB, Express, React, Node)   2021
- Implemented all the functionalities which are being used in Disney+ website.
- Used an external CSS to provide a similar look to the clone.

MyCoVTest Hub – Java, Servlet, JSP, Hibernate   2021
- MyCoVTest hub helps collect the test results and accurately picture the local cases, including more detailed demographics and a regional breakdown by postcode.

Cars Here – JavaScript, HTML, CSS   2020
- Car's here is a website where users can look for cars from a given list to view the details of the cars and their reviews.

SHOPPY – Android, JAVA, Firebase   2020
- SHOPPY is a shoe shopping application; the entire application was developed through an agile model.
- Along with the agile model, users can fill the **software development life cycle** while using the application.

Snapkart Portfolio – JAVA, JSP, Servlet, MySQL   2017
- A web application where users can join and share their portfolio with advertising agencies for photoshoot selection.
- Deployed on a server with the help of FileZilla and **(AWS) EC2 instance** through Linux operating system

EXPERIENCE

Software Developer   Jan 2019 – Jan 2020
Gateway Group Inc. Ahmedabad, India
- Implemented **software development life cycle** from requirement gathering to testing of an application.
- Created use cases, class diagrams, activity diagrams on UML (Unified Modeling Language) platform.
- Designed front end of applications using **client-side JavaScript such as react, angular.**
- Research and collaborated with the board of directors to design and deliver the best experience to the customers.

  Foodi-LO – Asp.NET MVC, MySQL
  - Designed and developed an online food ordering platform for Gateway Digital employees.
  - Attend regular scrum meetings on JIRA and update daily tasks through GIT.
  - Integrated web APIs as well to the application.

  Auto Dap – Angular JS, Node JS, MongoDB, Express.JS
  - Developed an online car service portal using 3rd party API and connected with the live streaming website.
  - Contributed through developing components and server-side integration using Node.js
  - Implemented agile methodology, including scrum model and test cases at different periods.

Software Developer Intern   May 2018 – Dec 2018
Brainy Beam Technology, Ahmedabad, India
- Assisted organization in developing the customized solution using salesforce platform and developed and determined CRM needs.
- Played a vital role in the team of data projects and assisted in designing, coding, and implementing salesforce applications.
- Provided end-user IT support and resolving client issues based on the computer system and software applications.
